

JOB TITLE: PRODUCT FOCUS BUSINESS ANALYST

LOCATION: GUILDFORD

DEPARTMENT: PRODUCT

WORKING FOR OEM

> ABOUT OPEN ENERGY MARKET

Open Energy Market is an innovative and fast-growing company building technology that is re-defining the commercial energy buying space. We were built to replace the staid broker model and bring energy management up-to-date with automation, transparency, and applied industry expertise behind it. We bring energy suppliers and buyers together in a way no other company does: maximising information, clarity, and support. That collaborative and open approach grows from the heart of our business. From our development department to our commercial and trading arms, every team member is invested in growing the company to meet the future.

That may be bringing innovative new products to market, recognising gaps in data provision that can benefit the whole industry, or enhancing the UI of our ground-breaking proprietary tech. We all feed off each other's ideas, and work as a team to achieve OEM's goals. We're proud of our work, but never so proud we stand still. When you join OEM, you can expect your opinion to be heard, your skills used, and your experience grown.

Since our launch in 2013, we have built an impressive portfolio of clients and partners, providing a platform for large-scale energy buyers to manage their energy portfolios and procurement process. Our clients are some of the largest names and brands within the UK.

For more information about us and what we do, head to openenergymarket.com.

Due to a significant recent investment and our plans for rapid expansion, we are seeking enthusiastic, intelligent and creative team members to join us. You can expect to join a dynamic team, and see your efforts reflected directly in the success of the business.

JOB DESCRIPTION

> PRODUCT FOCUS BUSINESS ANALYST

The Role

We are seeking a Business Analyst to join the Product Team. We are undertaking a significant product upgrade project which will expedite our continued growth. You will be working on all stages of the product lifecycle from idea to delivery and beyond. You will be responsible for gathering requirements from business stakeholders and domain experts. You will be required to translate the requirements into workable solutions. This will be done in parallel with the Technical Architect and CTO. You should be capable of preparing clear and concise technical specifications. These should be created using industry standard stories and acceptance criteria. Also, you will work alongside our Quality Assurance team. This will entail ensuring that improvements released are of the highest quality. This is a highly focused role. It has been created to ensure the smooth delivery of the product upgrade project. This is a permanent role which will move to focus on delivering the post-project roadmap.

You will be given a high level of autonomy in this role and will report directly to the Chief Technology Officer. Our office is based 5 minutes from Guildford railway station. You should be comfortable working in a mature and collaborative manner and have no issue in conversing with non-technical employees across multiple time zones.

Your Skills

We'd like you to use your experience and skills in this role and they should include:

- Demonstrable experience of delivery and success within complex project environments.
- Exceptional end to end analysis, design and problem-solving skills. They should be used to refine a problem and come up with the optimal solution or implementation.
- Excellent self-motivation and interpersonal skills. You should have the ability to develop relationships throughout the business and encourage participation and knowledge sharing with other stakeholders. You will be key in guiding the product in the appropriate direction.
- A pragmatic 'get on and get the job done' attitude.
- Experience in Agile principles, delivery and working practices.
- The ability to create detailed user stories and acceptance criteria.
- Broad technical knowledge (we are a hybrid Microsoft .Net/ Azure/ AWS technical stack), and ability to quickly assimilate new skills/knowledge.
- Experience in managing development projects.
- Experience of transitioning to a DevOps approach to delivery.
- Excellent planning and organisational skills.
- The ability to quickly and clearly sketch / wireframe / articulate ideas for both users and developers.
- The ability to prioritise according to trade-offs.
- Great communication and influencing skills.
- Excellent presentation skills. These should include the ability to breakdown and communicate technical information to a non-technical audience.

HOW TO APPLY

> PRODUCT FOCUS BUSINESS ANALYST

To apply for this position, please send your CV with a covering note to jobs@openenergymarket.com, clearly indicating the position you are applying for.

Alternatively, you can use the application form on our recruitment page, clearly indicating the role you are applying for: <https://info.openener.gy/work-with-oem>

We look forward to hearing from you - good luck!

Please note:

Salary dependent on experience

For this position, we are not responding to recruiters.

Due to the high number of applicants for promoted roles, we often aren't able to respond to every application that we receive. If you haven't heard from us within seven days, then unfortunately your application hasn't been successful.
